

ArcGIS Desktop 10.8.1 Installation Manual

Get the installation program (from ESRI Japan)

0. Access the ESRI Japan "Academic Pack: ArcGIS Desktop Product Download Page" (URL below).

https://esri-japan-support.custhelp.com/app/answers/detail/a_id/7776#tab2

Required Installation Programs are

- (1) ArcGIS Desktop 10.8.1
(ArcGIS_Desktop_1081_en_175117.exe) [EXE 1.2GB] and
- (2) Japan support pack (JpnPack_Desktop10_8_1.msi) [MSI 65.4MB].

Please download the two installation program files.

*Apply patches, additional programs, etc. as needed.

Perform installation

(ArcGIS 10.8.1→Domestic Support Pack→*patch, in that order)

Note:

When installing, starting, and using ArcGIS, you must be connected to the university network and be able to communicate with the license server (27004@arcgis.u.tsukuba.ac.jp). When using ArcGIS off-campus, please use the VPN service provided by the Academic Computing & Communications Center to connect to the campus network.

1. Install the downloaded ArcGIS_Desktop_1081_en_175117.exe file first. Right-click and click [Run as administrator(管理者として実行)]. If the User Account Control screen appears, click "Yes(はい)".

2. The program will automatically decompress. Follow the dialog to install the program.
3. When the "ArcGIS Desktop 10.8.1 has been successfully installed(ArcGIS Desktop 10.8.1 が正常にインストールされました)" screen appears, click "Finish(完了)".

The ArcGIS Administrator Wizard (license authentication) will be started, but will set it up later. Click "Cancel(キャンセル)" to cancel the wizard.

4. The installation of "ArcGIS Desktop 10.8.1 - Japanese Language Pack(日本語パック)" will start automatically. Click "OK" after waiting for the message "...setup has been successfully completed(...セットアップが正常終了しました)".

Install Japan Support Pack

Install the font styles for Japan, the coordinate system file for Japan, and the domestic data conversion tool.

5. double-click JpnPack_Desktop10_8_1.msi downloaded in item 0 to execute it.
6. The installation wizard of the JpnPack will be launched. Follow the dialog to install.
7. The "ArcGIS Desktop 10.8.1 - Domestic Support Pack successfully installed(ArcGIS Desktop 10.8.1 -国内対応パック を正常にインストールしました)" screen will appear. Uncheck the "Launch Shapefile Character Setup Utility(シェープファイル文字コード設定ユーティリティ起動)" check box and click "Finish(完了)".

License Authentication

8. Run "ArcGIS" > "ArcGIS Administrator" from the start menu. Choose the product selection from (Concurrent Use(同時使用)). Select "Define License Manager Now(今すぐライセンスマネージャを定義)" and enter "27004@arcgis.u.tsukuba.ac.jp" and click "OK".

ArcGIS Administrator will be launched when the settings are correct. Click "OK".

Borrowing and Returning Licenses

ArcGIS requires a connection to the campus network to start, but if you want to use ArcGIS in a place where there is no network connection, you can borrow a license to use ArcGIS for a limited period (60 days) without a connection to the license server.

1. Run "ArcGIS" > "ArcGIS Administrator" from the start menu
2. The ArcGIS Administrator dialog box will appear.

Select the Borrow/Return(借用/返却) folder, tick the checkboxes for the features you wish to borrow, and click [Apply(適用)]. After borrowing the license, click [OK] to close the ArcGIS Administrator.

You will now be able to use the ArcGIS software while disconnected from the network.

Borrowed licenses are valid for 60 days (timeout). After the expiration date, the license will automatically become invalid. To return the license within this period, un-tick the checkbox and click "Apply(適用)".
