

SPSS Statistics 28.0 for Windows

SPSS Installation Manual with Site License

Starting with version 28, the name and location of the file used to extend the maximum borrowing period of a Commuter license to 30 days has changed. Also, the way to start the Commuter utility has changed.

Note: You do not need to be connected to the network when installing SPSS, but you must be connected to the university network and able to communicate with the license server (spss.u.tsukuba.ac.jp) when starting and using SPSS. When using off-campus, please use VPN service to connect to the campus network.

Get Installation Program

0. Start a Web browser on a PC connected to the campus network and type <https://www.u.tsukuba.ac.jp/SOFT/SPSS2/> in the address bar.

Click "Windows (SSC_64-bit_28.0.0.0_MWins.exe)" to download the file.

★If you are outside the university, please use the VPN service provided by the Academic Computing and Communications Center to connect to the university network.

SPSSダウンロード

[SPSSサイトライセンスの詳細及び本学でのインストール方法について](#) : 5

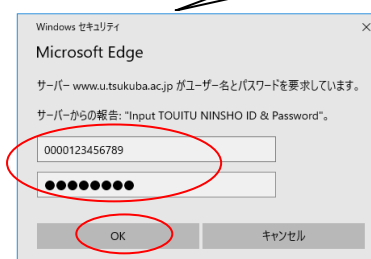

[動作環境について](#)

IBM SPSS Statistics 28.0 (Windows版, MacOS版)

* Linux版の提供はなくなりました : [参考リンク IBM Support](#) *

- **Windows** (839MB ; exe, Windows 10 64bit 以降対応)
- **Macos** (837MB ; pkg, MacOS 10.13 以降対応)
- マニュアル [日本語](#) (21.4MB ; zip) / [英語](#) (98.3MB ; zip) *一部のマニュアルは英語版

Enter your Unified Authentication ID [13-digit number] and password, then click "OK".

Perform installation

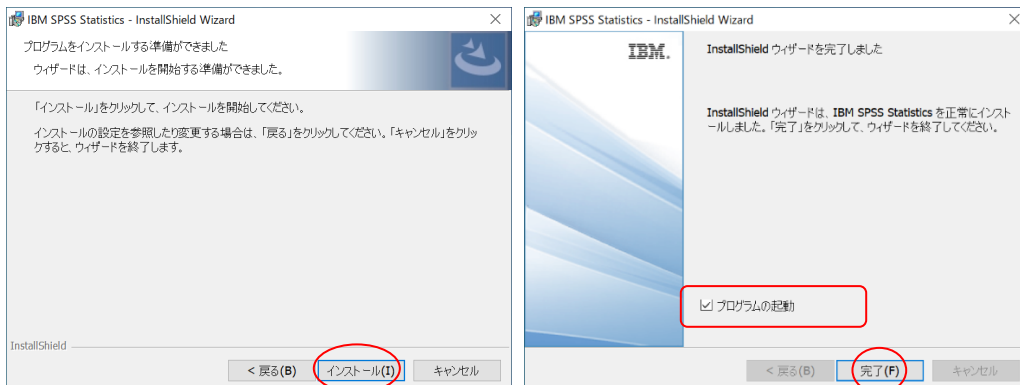

Right-click the downloaded exe file and click "管理者として実行(Run as administrator)". If the User Account Control screen appears, click "はい (Yes)".

1. The installation wizard will start. Click "次へ(NEXT)".
2. The license agreement will be displayed. After confirming the agreement, select "使用許諾契約の条項に同意します (I accept the terms of the license agreement)" and click "次へ(NEXT)".
3. A screen for specifying the destination folder for installation will appear. Click "次へ(NEXT)" if you are satisfied with the installation.

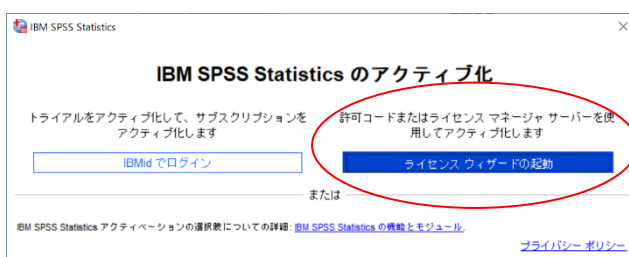

4. If there are no changes to the installation, click "インストール(Install)". Copying of the files will begin. Wait for a while.
5. The Installation Complete window will appear. Leave the "プログラムの起動(Launch Program)" checkbox checked and click "完了(Finish)" (to continue with the license authentication).

License Activation (Set License Manager Name)

6. [IBM SPSS Statistics のアクティビ化](The Activate IBM SPSS Statistics) screen will appear. Click on "ライセンスウィザードの起動(Activate License Wizard)".

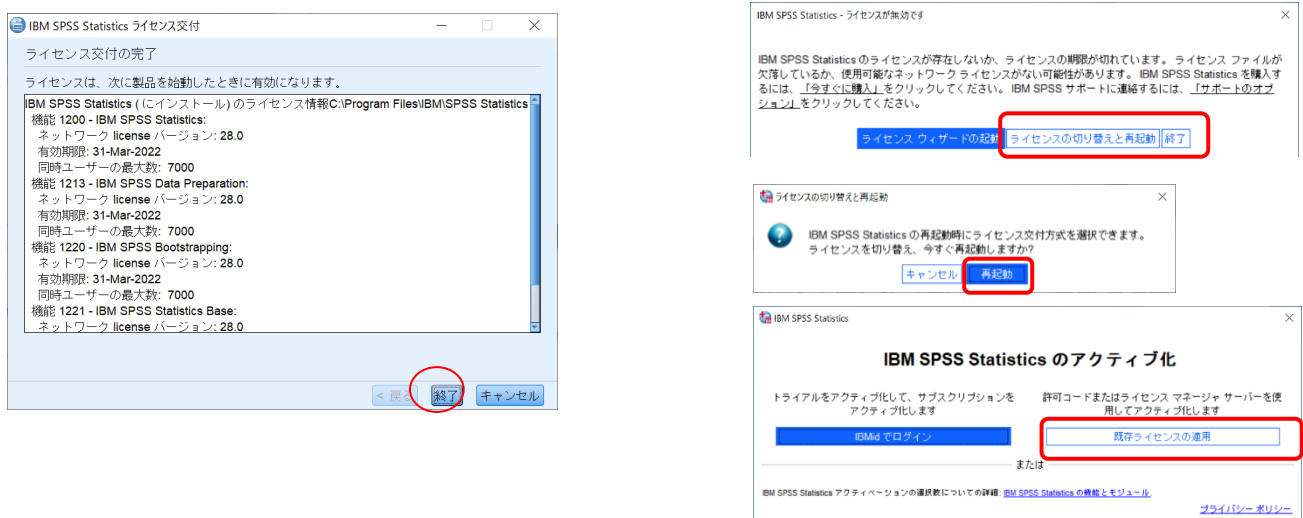

7. The "ライセンスの状態(License Status)" screen will appear. Click "次へ(Next)".
8. The "製品の認証(Product Activation)" screen will appear. Select "同時ユーザライセンス(Concurrent User License)" and click "次へ(Next)".

9. Enter "spss.u.tsukuba.ac.jp" in "ライセンスマネージャーサーバー名または IP アドレス(License Manager Server Name or IP Address)" and click "次へ(Next)".

10. The "ライセンス交付の完了(License Delivery Complete)" screen will be displayed. Click "終了(Exit)".
11. Select "ライセンスの切り替えと再起動(Switch License and Restart)" and restart the system. Click "既存ライセンスの適用(Apply Existing License)" on the "アクティブ化(Activation)" screen that reappears.

Use SPSS Commuter License

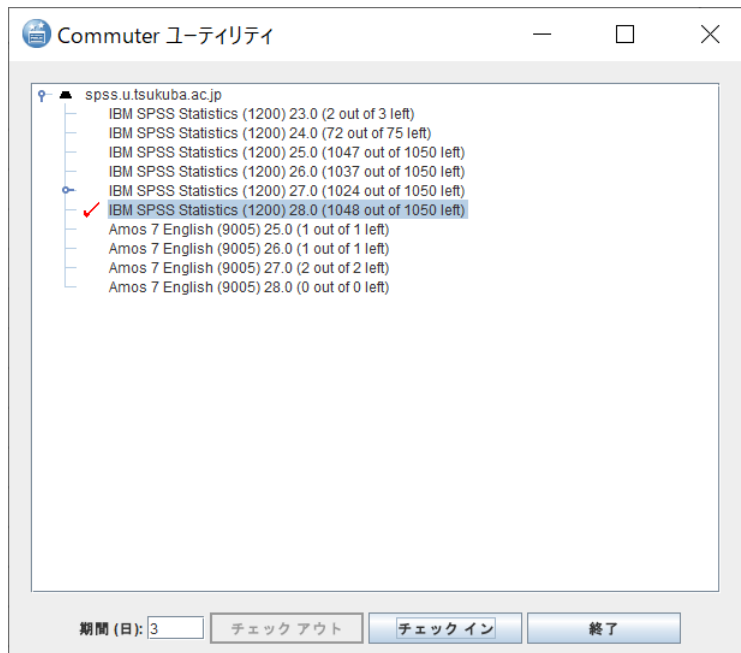

SPSS requires a connection to the campus network to start, but by checking out (borrowing) a license, you can use SPSS in places where there is no network connection

* Borrowing is set up while connected to the campus network

1. Start SPSS. Select "ライセンスの管理(License Management)" from the "ファイル(File)" menu and click "Commuter ユーティリティ ツールの起動(Launch Commuter Utility Tool)".

2. The Commuter utility screen will appear. Select "IBM SPSS Statistics...", which is the same as the version you are using, and click "Checkout". If the borrowing is successful, a red check mark will appear at the beginning of the string, and click "終了(Finish)". (The default is 3 days, but you can borrow for up to 7 days; to borrow for 7 days, change the period field from "3" to "7" and then click "チェックアウト(Checkout)").

[再起動(Reboot)] is optional.

Reference

The borrowing period is limited to 7 days as the installation default. By changing the settings on the client PC in the following manner, it is possible to check out for a maximum of 30 days. However, even in this case, the period value must be explicitly changed at the time of checkout.

1. Open the commutelicense.ini file in the installation directory.
Example: Local disk(C:) ► Program Files ► IBM ► SPSS Statistics
2. Replace the CommuterMaxLife value with 30.
3. Save the file and close it.

If you cannot save the file, check the "Security" tab in the properties of the commutelicense.ini file. It is denied because you do not have write permission under the user name that is logged in to that PC. Please "Allow" that user to write.

```
*commutelicense.ini - メモ帳
