

~ About Windows 10 Upgrade~

Academic Computing & Communications Center, University of Tsukuba

Organization for Information Infrastructure EES service helpdesk

Creation date : 2019/7/19 (Last updated on 2020/12/2)

Microsoft's General Agreement for Academic Institutions (EES), which our university has contracted, allows you to upgrade the Windows OS. This section mainly describes how to upgrade in the Windows OS environment.

※ “Upgrade” means, in principle, conversion from the currently used OS to a higher level version. For this reason, new OS installations on PC without an OS are not covered.

※ In addition, at this helpdesk, we do not support at the time of OS installation. Please do everything at your own risk.

1. Prior precautions

(1) When upgrading to Windows 10, you need to be aware of the following at your own risk.

※ Please check the support status of software and of PC peripherals.

※ In addition, please refer to various sites about Windows 10 upgrade of Microsoft. Reference site → Windows 10 specification page (External site: <http://windows.com/windows10specs>)

(2) Please refer to the following page for the licensee of the Enrollment for Education Solutions (EES) that we carry out at our university.

<https://ds.cc.tsukuba.ac.jp/ms-ees/ees.html>

Only the faculties are permitted to download/install to his/her own devices. Also, installation and upgrade are permitted to PCs owned by the Univ. and are managed under the faculties.

In the cases that students doing the upgrade to the laboratory PCs (owned by the Univ.), the installer must be downloaded by the supervisor of the laboratory.

(3) The version currently available on the web is Windows 10 Enterprise Edition (ver2004). For previous versions, media will be lent out. Newer versions are under preparation.

<https://ds.cc.tsukuba.ac.jp/ms-ees/ees.html#software>

- About media lend

<https://ds.cc.tsukuba.ac.jp/ms-ees/media.html>

2. Upgrade Procedure

(1) From the following URLs, please choose the one that suits your environment.

Currently upgrading under Windows, we recommend downloading and unzipping the zip format.

It is recommended to use ISO format for Mac.

For Windows OS installation on Mac, you can use the Windows OS license provided by EES using one of the following two methods.

- Using Windows OS with Apple Boot Camp
- Deploy Windows OS as virtual OS on third party virtual software (*) on Mac

OS. ※ Virtual software refers to VMware Fusion, Parallels Desktop, Virtual Box,

etc. Please confirm for yourself about the specific installation method.

※ Below, when downloading, you are required to enter your ID and password.

Please use unified authentication ID (UTID-13) and password.

(2) About decompression of zip data and ISO file

Unzip zip data

As the zip function of Windows can not decompress normally due to the file size of zip data, please install 7zip and other free decompression software to unzip.

The URL about 7zip is shown as reference information.

External site (<https://sevenzip.osdn.jp/>)

※ Please install after checking the number of bits of client OS. 64bit or 32bit.

When installation of 7zip is completed, please decompress with 7zip. (Select unzip with 7zip with right click on zip data)

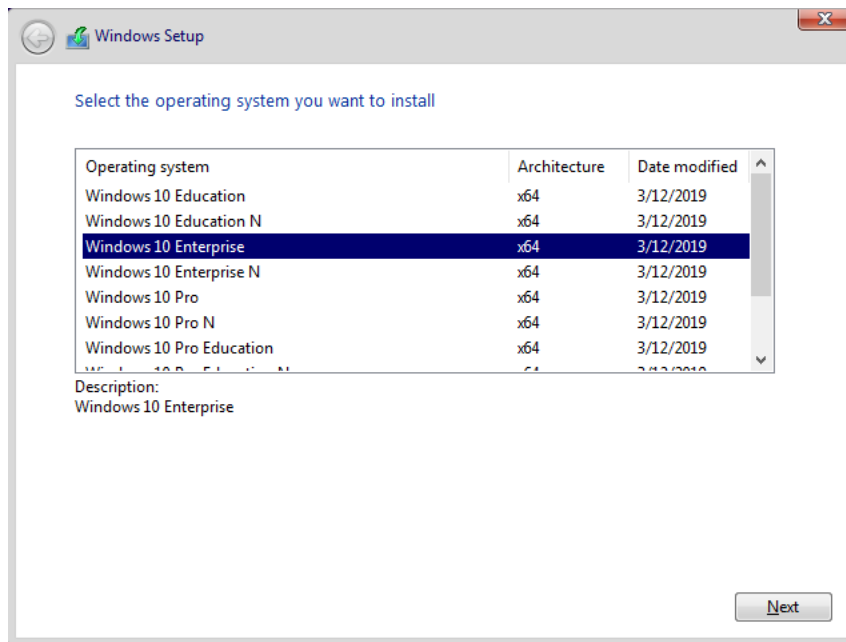

For mounting ISO data on Mac, the URL is shown for reference.

External site (<https://www.kotalog.net/archives/4412>)

(3) After decompression, execute setup.exe in the decompression folder and install according to each dialog screen.

※ For "Select image", select the edition to upgrade. Select "Windows 10 Enterprise" here.

If you select another image and install it, please be aware that problems may occur during license activation.

(4) After upgrading to Windows 10, apply the license according to the following procedure.

※ If you do not activate the license, after a while, the function of Windows OS will be restricted and unavailable.

① Please access to Download Station and login.

<https://ds.cc.tsukuba.ac.jp/download/>

※ Please refer to the following manual for how to use Download Station

https://ds.cc.tsukuba.ac.jp/ms-ees/doc/Download_Station_Manual.pdf

② Select "Download Software"

③ Select "Microsoft EES"

④ Select "License application tool"

⑤ Select "Microsoft License App"

⑥ Please execute what you downloaded. **After installation is complete, please restart your PC.**

⑦ To confirm that the license activation has been completed,
Please check the license activation part of the system information.

You can check it from Control Panel → System and Security → System →

"Windows License Activation".

If "Windows is licensed" is displayed, it is validated.

※ If you are not licensed, please check here.

<https://ds.cc.tsukuba.ac.jp/ms-ees/activation.html#fail>

(5) The upgrade is complete.
